Notes to the Financial Statements	10 - 40

The directors present this statement to the members together with the audited financial statements of the Company for the financial year ended March 31, 2020.

1 Directors

The directors in office at the date of this statement are:-

Abhishek Avinash Sehgal N Sriram

2 Arrangements to enable directors to acquire shares and debentures

Neither during nor at the end of the financial year was the Company a party to any arrangement whose objects are, or one of whose objects is, to enable the directors of the Company to acquire benefits through the acquisition of shares in, or debentures of the Company or any other body corporate.

3 Directors' interest in shares and debentures

The directors holding office at the end of the financial year had no interests in shares, debentures, warrants or share options of the Company as recorded in the Register of Directors' Shareholding kept by the Company under Section 164 of the Singapore Companies Act.

4 Share options

During the financial year, there were:

- (i) no options granted by the Company to any person to take up unissued shares of the Company; and
- (ii) no shares issued by virtue of any exercise of option to take up unissued shares of the Company.

As at the end of the financial year, there were no unissued shares of the Company under option.

5 Auditors

The auditors, Natarajan & Swaminathan, have expressed their willingness to accept re-appointment.

6 Directors' opinion

In the opinion of the directors,

- (a) the financial statements of the Company are drawn up so as to give a true and fair view of the financial position of the Company as at March 31, 2020 and the financial performance, changes in equity and cash flows of the Company for the financial year ended on that date in accordance with the provisions of the Singapore Companies Act, Cap. 50 and Financial Reporting Standards in Singapore; and
- (b) at the date of this statement there are reasonable grounds to believe that the Company will be able to pay its debts as and when they fall due.

The Board of Directors

Abhishek Avinash Sehgal

INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF NIIT TECHNOLOGIES PTE. LTD. FOR THE FINANCIAL YEAR ENDED MARCH 31, 2020 (Incorporated in the Republic of Singapore)

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **NIIT TECHNOLOGIES PTE. LTD.** (the "Company"), which comprise the statement of financial position of the Company as at March 31, 2020, and the statement of comprehensive income, statement of changes in equity and statement of cash flows of the Company for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements are properly drawn up in accordance with the provisions of the Singapore Companies Act, Chapter 50 (the "Act") and Financial Reporting Standards in Singapore (FRS) so as to give a true and fair view of the financial position of the Company as at March 31, 2020 and of the financial performance, changes in equity and cash flows of the Company for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with Singapore Standards on Auditing (SSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Accounting and Corporate Regulatory Authority (ACRA) *Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities* (ACRA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the Directors' Statement set out on pages 1 to 2.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Act and FRS, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSA, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
 or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that
 is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
 collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

Auditors' Responsibilities for the Audit of the Financial Statements (Cont'd)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In our opinion, the accounting and other records required by the Act to be kept by the Company have been properly kept in accordance with the provisions of the Act.

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

1 Corporate information

The Company (Registration No. 199503929E) is a private limited Company incorporated and domiciled in Singapore.

The registered office and principal place of business are at 31 Kaki Bukit Road 3, #05-08 Techlink, Singapore 417818.

The principal activities of the Company are development and distribution of computer software and the provision of consultancy, training and support services.

Holding company

The Company is a wholly owned subsidiary of **NIIT Technologies Ltd**, a company incorporated in the Republic of India.

Branch office

The Company has registered a Branch in Hong Kong and the revenue and expenses of the branch has been incorporated in the financial statements.

Subsidiaries

Refer Note 5 to the financial statements.

There have been no significant changes in the nature of these activities during the financial year.

2 Significant accounting policies

a) Basis of preparation

The financial statements have been prepared in accordance with Financial Reporting Standards in Singapore ("FRS") as required by the Singapore Companies Act, Chapter 50. These financial statements are the separate financial statements of NIIT Technologies Pte. Ltd. The Company is exempted from the preparation of consolidated financial statements as the Company is a whollyowned subsidiary of NIIT Technologies Ltd, a company incorporated in India, which prepares consolidated financial statements available for public use. The registered office of NIIT Technologies Ltd is as follows:

8 Balaji Estate Guru Ravidas Marg, Kalkaji New Delhi 110019

The financial statements are expressed in Singapore Dollar (S\$) and are prepared under the historical cost convention except as disclosed in the accounting policies below.

The preparation of financial statements in conformity with FRS requires management to exercise its judgement in the process of applying the Company's accounting policies. It also requires the use of accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the financial year.

a) Basis of preparation (Cont'd)

These estimates and assumptions are assessed on an on-going basis and are based on experience and relevant factors, including expectations of future events that are believed to be reasonable under the circumstances (refer **Note 2(b)** to the financial statements).

The Company adopted the new or revised FRS that is mandatory for application on that date. This includes the following FRS, which are relevant to the Company as a single entity:

FRS 28	(Amendments)	: Long-term Interests in Associates and Joint Ventures
FRS 109	(Amendments)	: Prepayment Features with Negative Compensation
FRS 116		: Leases

Improvements to FRSs

Annual Improvements to FRS (March 2018)

FRS 12	(Amendments)	: Income Taxes
FRS 23	(Amendments)	: Borrowing Costs
FRS 103	(Amendments)	: Business Combinations
FRS 111	(Amendments)	: Joint Arrangements

Adoption of new and amended standards and interpretations

FRS 116 Leases

FRS 116 supersedes FRS 17 Leases, INT FRS 104 Determining whether an Arrangement contains a Lease, INT FRS 15 Operating Leases-Incentives and INT FRS 27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognise most leases on the statement of financial position.

The Company adopted FRS 116 using the modified retrospective method of adoption with the date of initial application of 1 April 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application as an adjustment to the opening balance of retained earnings. The Company elected to use the transition practical expedient to not reassess whether a contract is, or contains a lease at 1 April 2019. Instead, the Company applied the standard only to contracts that were previously identified as leases applying FRS 17 and INT FRS 104 at the date of initial application.

The effect of adopting FRS 116 as at 1 April 2019 was as follows:

Increase/(decrease)

	S\$
Plant and equipment	121,741
Lease liability	121,741

Before the adoption of FRS 116, the Company classified each of its leases (as lessee) at the inception date as an operating lease. The accounting policy prior to 1 April 2019 is disclosed in **Note 2(q)**.

a) Basis of preparation (Cont'd)

Adoption of new and amended standards and interpretations

Upon adoption of FRS 116, the Company applied a single recognition and measurement approach for all leases except for short-term leases and leases of low-value assets. The accounting policy beginning on and after 1 April 2019 is disclosed in **Note 2(q)**. The standard provides specific transition requirements and practical expedients, which have been applied by the Company.

Leases previously accounted for as operating leases

The Company recognised right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets for the leases were recognised at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the statement of financial position immediately before the date of initial application. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Company also applied the available practical expedients wherein it:

- used a single discount rate to a portfolio of leases with reasonably similar characteristics;
- relied on its assessment of whether leases are onerous immediately before the date of initial application as an alternative to performing an impairment review;
- applied the short-term leases exemption to leases with lease term that ends within 12 months of the date of initial application;
- excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application; and
- used hindsight in determining the lease term where the contract contained options to extend or terminate the lease.

Based on the above, as at 1 April 2019:

- right-of-use assets of S\$121,741 were recognised and presented within plant and equipment; and
- additional lease liabilities of S\$121,741 were recognised.

The lease liabilities as at 1 April 2019 can be reconciled to the operating lease commitments as of 31 March 2019, as follows:

Operating lease commitments as at 31 March 2019184,311Less:184,311Commitments relating to non-lease components36,860Commitments relating to short-term leases12,603134,848134,848Weighted average incremental borrowing rate as at 1 April 20196.48%Discounted operating lease commitments as at 1 April 2019121,741Lease lick litting as at 1 April 2019121,741		S\$

b) Critical judgements in applying the entity's accounting policies

In the process of applying the entity's accounting policies, management is of the opinion that there are no critical judgements (other than those involving estimates) that have significant effect on the amounts recognised in the financial statements.

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the statement of financial position date, that have significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Depreciation

The Company depreciates the plant and equipment over their estimated useful lives, after taking into account their estimated residual values, if any, using the straight-line method. The estimated useful life reflects the directors' estimate of the years that the Company intends to derive future economic benefits from the use of the Company's plant and equipment. The residual values reflect the directors' estimated amount that the Company would currently obtain from disposal of the asset, after deducting the estimated costs of disposal, if the assets were already of the age and in the condition expected at the end of its useful life.

Provision for expected credit losses of trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust historical credit loss experience with forward-looking information. At every reporting date, historical default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

c) Foreign currency transactions

(i) Functional currency

The functional currency of the Company is Singapore Dollar, being the primary currency in which the Company transacts its sales and purchases.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of transactions.

- c) Foreign currency transactions (Cont'd)
 - (ii) Transactions and balances (Cont'd)

Foreign currency monetary assets and liabilities are translated into the functional currency at the exchange rates prevailing at the statement of financial position date.

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation of foreign currency denominated assets and liabilities are recognised in the profit or loss.

Currency translation differences on non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gain or loss arising on translation of non-monetary items are measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in other comprehensive income or profit or loss are also recognised in other comprehensive income or profit or loss, respectively).

d) Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation and impairment loss, if any. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use. Expenditure for additions, improvements and renewals are capitalised and expenditure for maintenance and repairs are charged to the profit or loss. When assets are sold or retired, their cost and accumulated depreciation and impairment loss are removed from the financial statements and any gain or loss resulting from their disposal is included in the profit or loss.

e) Depreciation of plant and equipment

Depreciation is calculated on a straight-line method to write off the cost of the plant and equipment over their estimated useful lives as follow:-

Furniture & fittings	-	3 to 5 years
Office equipment	-	3 years
Computer equipment	-	1 to 3 years
Right-of-use assets	-	Over the lease term (27 months)

Fully depreciated assets still in use are retained in the financial statements.

The residual values, estimated useful lives and depreciation method of plant and equipment are reviewed, and adjusted as appropriate, at each statement of financial position date. The effects of any revision are recognised in the profit or loss when the changes arise.

f) Investment in subsidiaries

Subsidiaries are investees that are controlled by the Company. The Company controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Investments in the subsidiaries are carried at cost less accumulated impairment loss in the Company's statement of financial position. On disposal of investments in subsidiaries, the differences between disposal proceeds and the carrying amounts of the investments are recognised in the profit or loss.

g) Impairment of non-financial assets

At each statement of financial position date, the Company reviews the carrying amounts of its plant and equipment, capitalised software and investment in subsidiaries to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the greater of net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

When an impairment loss subsequently reverses, the carrying amount of the asset (cashgenerating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of impairment loss is recognised immediately in profit or loss unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

h) Financial instruments

Financial instruments comprise financial assets and financial liabilities. A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss (FVPL).

h) Financial instruments (Cont'd)

(i) Financial assets (Cont'd)

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Trade receivables do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined per the Company's revenue recognition policy.

Financial assets that are classified and measured at amortised cost or fair value through OCI, are financial assets that give rise to cash flows that are "solely payments of principal and interest (SPPI)" on the principal amount outstanding. The assessment is referred to as the SPPI test and is performed at an instrument level.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Subsequent measurement

For the purposes of subsequent measurement, financial assets are classified in four categories:-

- Financial assets at amortised cost
- Financial assets at fair value through OCI with recycling of cumulative gains and losses ("FVOCI")
- Financial assets elected at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

The Company's relevant financial assets category are financial assets at amortised cost.

Financial assets at amortised cost

The Company measures financial assets at amortised cost if both of the following conditions are met:-

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Notes to the Financial Statements

2 Significant accounting policies (Cont'd)

- h) Financial instruments (Cont'd)
 - (i) Financial assets (Cont'd)

Initial recognition and measurement

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. For short-term receivables the nominal cost approximates the fair value.

The Company's financial assets at amortised cost includes trade and other receivables.

Derecognition

A financial asset is derecognised when the rights to receive cash flows from the asset have expired or the Company has transferred its rights to receive cash flows from the asset or has entered into a "pass-through" arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received and any cumulative gain or loss that had been recognised in other comprehensive income for debt instruments is recognised in profit or loss.

Impairment of financial assets

The Company recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at FVPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is recognised for credit losses expected over the remaining life of the exposure, irrespective of timing of the default (a lifetime ECL).

- h) Financial instruments (Cont'd)
 - (i) Financial assets (Cont'd)

Impairment of financial assets (Cont'd)

For trade receivables and contract assets, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment which could affect debtors' ability to pay.

The Company makes judgmental assessment for financial asset in default when contractual payments are past due. The Company considers a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

(ii) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. For short term payables the nominal costs approximate the fair value.

The Company's financial liabilities include trade and other payables.

Subsequent measurement

The measurement of financial liabilities depends on their classification.

After initial recognition, financial liabilities that are not carried at FVPL are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the amortisation process.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires when an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. On derecognition, the difference between the carrying amounts and the consideration paid is recognised in profit or loss.

i) Contract asset

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

j) Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of unpledged fixed deposits and cash at banks.

k) Contract liabilities

A contract liabilities relate to the Company's obligations to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

l) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each statement of financial position date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed. Where the effect of the time value of money is material, provisions are discounted using a current pre- tax rate that reflects, where appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

m) Related party

A related party is defined as follows:

- (a) A person or a close member of that person's family is related to the Company if that person:
 - (i) has control or joint control over the Company;
 - (ii) has significant influence over the Company; or
 - (iii) is a member of the key management personnel of the Company or its holding Company.
- (b) An entity is related to the Company if any of the following conditions applies:
 - The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others, classified as related company);
 - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);

- m) Related party (Cont'd)
 - (b) An entity is related to the Company if any of the following conditions applies:
 - (iii) Both entities are joint ventures of the same third party;
 - (iv) One entity is a joint venture of the third entity and the other entity is an associate of the third party;
 - (v) The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company. If the Company is itself such a plan, the sponsoring employers are also related to the Company;
 - (vi) The entity is controlled or jointly controlled by a person identified in (a);
 - (vii) A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
 - (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or its holding company.

n) Revenue recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties and based on the transaction price, which is the consideration, adjusted for volume discounts, service level credits, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers, if any.

Revenue is recognised when the Company satisfies a performance obligation by transferring a promised good or service to the customer, which is when the customer obtains control of the good or service. A performance obligation may be satisfied at a point in time or over time. The amount of revenue recognised is the amount allocated to the satisfied performance obligation.

The Company revenue is generated from its sale of hardwares, softwares and licences; provision of consultancy services and provision of maintenance and software support services. Revenue from sale of hardwares, softwares and licences are recognised when they are delivered to the customer and all criteria for acceptance are satisfied. Revenue from consultancy services are recognised as and when services are rendered over the time period. Revenue from maintenance and software support are recognised based upon the period/ time of usage.

The Company does not provide any volume discount nor has any sales with right of return.

The amount of revenue recognised is based on the transaction price, which comprises the contractual price and adjusted for expected returns. Based on Company's experience variable consideration (i.e. right to returns) is typically constrained and is included in the transaction only to the extent that is highly probable that is significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

- n) Revenue recognition (Cont'd)
 - The Company's revenue is recognised based on the following criteria:
 - (i) Revenue from rendering of services
 - (a) Time-and-material contracts

Revenue with respect to time-and-material contracts is recognised as the related services are performed.

(b) Fixed price contracts

Revenue related to contracts providing maintenance and support services, is recognised over the term of the contract. Revenue related to fixed price contracts is recognised in accordance with the percentage of completion method (PCM). The input (efforts expended) method is used to measure progress towards completion, as there is a direct relationship between input and productivity. Costs are recorded as incurred over the contract period. Any revision in cost to complete would result in increase or decrease in revenue and income and such changes are recorded in the period in which they are identified. Provisions for estimated losses, if any, on contracts-in-progress are recorded in the period in which such losses become probable based on the current contract estimates. Contract losses are determined to be the amount by which the estimated total cost to complete exceeds the estimated total revenues that will be generated by the contract and are included in cost of services and a corresponding provision is made.

For services accounted for under the PCM method, cost and earnings in excess of billing are classified as unbilled revenue, while billing in excess of cost and earnings are classified as deferred revenue.

(ii) Sale of products

Revenue from product sales are shown net of sales tax and applicable discounts and allowances. Revenue related to product with installation services that are critical to the product is recognised when installation of product at customer site is completed and accepted by the customer.

If the revenue for a delivered item is not recognised for non-receipt of acceptance from the customer, the cost of the delivered item is also deferred. Revenue from maintenance services is recognised ratably over the period of the contract.

(iii) Multiple-element arrangements

When a sales arrangement contains multiple elements, such as services, hardware and software products and licenses, revenue for each element is based on a selling price hierarchy. The selling price for a deliverable is based on its vendor specific objective evidence if available, third party evidence if vendor specific evidence is not available, or estimated selling price if neither vendor specific objective nor third party evidence is available.

- n) Revenue recognition (Cont'd)
 - (iii) Multiple-element arrangements (Cont'd)

The best estimate of selling price is established considering internal factors such as margin objectives, pricing practices and customer segment pricing strategies. Consideration is also given to market conditions such as competitor pricing strategies. In multiple-element arrangements, revenue is allocated to each separate unit of accounting using the relative selling price of each of the deliverables in the arrangement based on the aforementioned selling price hierarchy. If the arrangement contains more than one software deliverable, the arrangement consideration is allocated to each software deliverable based on its fair value.

Revenue recognition for delivered elements is limited to the amount that is not contingent on the future delivery of products or services, future performance obligations or subject to customer specified return or refund privileges.

Certain upfront non-recurring contract acquisition costs incurred in the initial phases of contracts are deferred and amortised usually on a straight line basis, over the term of the contract unless revenues are earned and obligations are fulfilled in a different pattern. The undiscounted cash flows from the arrangement are periodically estimated and compared with the unamortised costs. If the unamortised costs exceed the undiscounted cash flow, a loss is recognised.

When revenue is derived from sales of third party vendor services, material or licenses, revenue is recorded on a gross basis when the Company is a principal to the transaction and net of costs when the Company is acting as an agent between the customer and the vendor. Several factors are considered to determine whether the Company is a principal or an agent, most notably whether the Company is the primary obligor to the customer, has established its own pricing, and has inventory and credit risks.

o) Other income

Other income is recognised on the following basis:

Interest income

Interest income is recognised using the effective interest method.

Government grant Government grant is recognised upon receipt basis.

p) Employee benefits

Retirement benefit costs

As required by law, the Company makes contributions to the Central Provident Fund (CPF), a defined contribution plan regulated and managed by the Government of Singapore. CPF contributions are recognised as expense in the same year to which the contribution relates.

p) Employee benefits (Cont'd)

Employee entitlements to annual leave are recognised when they accrue to the employees. An accrual is made for the estimated liability for annual leave as a result of services rendered by the employees up to the statement of financial position date.

A liability for bonuses is recognised where the entity is contractually obliged or where there is constructive obligation based on past practice.

Key management personnel

Directors and certain managers that have the authority and responsibility for planning, directing and controlling the activities of the Company are considered key management personnel.

q) Leases

These accounting policies are applied on and after the initial application date of FRS 116, 1 April 2019:

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities representing the obligations to make lease payments and right-of-use assets representing the right to use the underlying leased assets.

Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment. The accounting policy for impairment is disclosed in **Note 2(g)**.

The Company's right-of-use assets are presented within plant and equipment (Note 3).

q) Leases (Cont'd)

Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term.

The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g. changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Company's lease liabilities are presented within lease liability (Note 14).

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

These accounting policies are applied before the initial application date of FRS 116, 1 April 2019:

Leases where the lessor effectively retains substantially all the risks and rewards of ownership of the leased item are classified as operating leases. Operating lease payments are recognised as an expense in the profit or loss on a straight-line basis over the lease term.

r) Finance costs

Interest expense and similar charges are expensed in the profit or loss in the year in which they are incurred.

s) Goods and services tax

Revenues, expenses and assets are recognised net of the amount of sales tax except:

- Where the sales tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the sales tax is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- Receivables and payables that are stated with the amount of sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

t) Income tax

Income tax expense represents the sum of tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are not taxable or tax deductible. The Company's liability for current tax is calculated using statutory tax rate at the statement of financial position date.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investment in subsidiaries, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset, realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt, within equity.

Income tax (Cont'd) t)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on net basis.

NIIT Technologies Pte. Ltd. Notes to the Financial Statements

6 Trade receivables

	2020	<u>2019</u>
	S\$	S\$
Outside parties Less: Allowance for doubtful debts	4,228,992	3,921,793
- Balance at beginning of year	28,451	28,131
- Charge for the year	66,702	320
- Balance at end of year	95,153	28,451
	4,133,839	3,893,342
Related party	55,158	10,732
	4,188,997	3,904,074

The average credit period for services rendered is 45 days to 60 days (2019:45 days to 60 days). No interest is charged on the trade receivables.

The table below is an analysis of trade receivables aging as at March 31:

	2020	<u>2019</u>
	S\$	S\$
Not past due	497,654	2,200,483
Past due 1 to 45 days	19,013	889,210
Past due 45 to 365 days	3,416,909	814,381
Past due more than 365 days	255,421	-
	4,188,997	3,904,074

The Company has not made any allowance on all these receivables as the directors are of the view that all the receivables are recoverable. Allowance for doubtful debts is made for receivables that the management deems has credit risk and is doubtful of full recovery. Trade receivables deemed as with credit risk relates to mainly debtors that have defaulted in payments, balances that are past due for more than 365 days, or have no further transactions with the Company. These receivables were not secured by any collateral or credit enhancement. The allowances are charged to profit or loss.

The trade receivables that are not denominated in Singapore Dollar are as follows:

	2020	2019
	S\$	S\$
Chinese Renminbi	392,664	303,996
Hong Kong Dollar	1,126,755	1,110,898

Notes to the Financial Statements

19 Profit before income tax

20

In addition to the charges and credits disclosed elsewhere in the notes to the income statement, this item includes the following charges/(credits):

	2020	<u>2019</u>
	S\$	S\$
Allowance for doubtful debts - trade (outside parties)	66,702	320
Foreign exchange gain	11,222	34,483
Rental on operating lease:		
- Gross	74,138	133,585
- Recoveries from employees	(19,543)	(14,403)
-		
Income tax expense		
	2020	<u>2019</u>
	S\$	S\$
Current year	-	-
Deferred tax	137,123	178,200
Foreign tax	6,695	9,950
	143,818	188,150

The income tax expense varied from the amount of income tax expense determined by applying the Singapore income tax rate of 17% to profit before income tax as a result of the following differences:

	<u>2020</u>	<u>2019</u>
	S\$	S\$
Profit before income tax	546,658	964,053
Tax expense at rate of 17%	92,932	163,889
Deferred tax asset:		
- Current year under/(over) provision	29,683	(1,162)
- Prior year under provision	25,918	28,379
Effect of difference in tax rate	(6,065)	(379)
Others	1,350	(2,577)
Income tax expense for the financial year	143,818	188,150

As at statement of financial position date, the Company had unutilised tax losses and capital allowances of approximately \$\$820,000 (2019:\$\$1,650,000) which are available for set off against the future taxable profits, subject to compliance with Section 37 of the Income Tax Act, Cap.134 and agreement by the Comptroller of Income Tax.

21 Holding company, subsidiaries, related companies and parties transactions

Some of the Company's transactions and arrangement are with holding company, subsidiaries, related companies and related parties and the effect of these on the basis determined between the parties is reflected in these financial statements. The balances with these parties are unsecured, interest free and repayable on demand unless otherwise stated.

During the year, the Company entered into the following trading transactions:

	<u>2020</u>	<u>2019</u>
	S\$	S\$
Holding Company		
Offshore software development charges paid	3,582,877	3,042,210
Management fees paid	114,039	96,280
Other costs paid	103,602	32,177
Subsidiaries		
Interest expense on loan	-	1,726
Other costs paid	-	27,653
Related Companies		
Offshore software development charges paid	1,558,631	1,240,288
Other costs recovered	1,677,879	476,174
Related Parties		
Other costs recovered	110,741	110,728
Professional services (expense)	-	184,164
Management fees paid	-	10,042
Other costs paid	-	16,502

22 Commitments

(a) Operating lease commitments - as lessee

The Company leases premises for office space and staff accommodation under non-cancellable operating lease agreements.

The future minimum rental payable under non-cancellable operating leases contracted for at the reporting date but not recognised as liabilities are as follows:

		2020	<u>2019</u>
		S\$	S\$
	Rental expense:		
	Within 1 year	42,922	88,917
	Within 2 to 5 years	-	95,394
		42,922	184,311
(b)	Other commitments		
		<u>2020</u>	<u>2019</u>
		S\$	S\$
	Banker's guarantee	534,175	418,570

22 Commitments (Cont'd)

$(b) \quad \text{Other commitments} \quad$

The bankers' guarantee is secured by the pledge of the Company's fixed deposits (refer **Note 9** to the financial statements).

The directors do not foresee crystallisation of these guarantees in the foreseeable future.

23 Financial instruments, financial and capital risk management

(a) Categories of financial instruments

The following table sets out the financial instruments as at the statement of financial position date:

	2020	<u>2019</u>
	US\$	US\$
Financial assets	03\$	03\$
Amortised cost:		
- Trade receivables	4,188,997	3,904,074
- Other receivables	865,123	200,441
Cash and bank balances	2,790,091	3,061,065
Total financial assets	7,844,211	7,165,580
Financial liabilities		
Amortised cost:		
-Trade payables and accruals (excluding GST)	4,056,427	2,452,797
- Other payables	322,589	301,595
- Lease liabilities	72,169	-
Total financial liabilities	4,451,185	2,754,392

(b) Fair value measurements

Fair value hierarchy

The assets and liabilities measured at fair value are classified by the following level of fair value measurement hierarchy:

- (i) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- (ii) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2); and
- (iii) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

There are no financial assets measured at fair value.

Assets and liabilities not measured at fair value

(i) Trade receivables and trade payables

The carrying amounts of these receivables and payables (including trade balances due from/to holding company, related party and related companies) approximate their fair values as they are subject to normal trade credit terms.

NIIT Technologies Pte. Ltd.

Notes to the Financial Statements

23 Financial instruments, financial and capital risk management (Cont'd)

(b) Fair value measurements (Cont'd)

(ii) Other receivables, cash and bank balances and other payables

The carrying amounts of these balances approximate their fair values due to the short-term nature of these balances.

(c) Financial risk management

The Company's activities expose it to a variety of financial risks from its operations. The key financial risks include liquidity risk, credit risk and market risk (including interest rate risk, foreign currency risk and price risk).

The directors review and agree policies and procedures for the management of these risks, which are executed by the management team. It is, and has been throughout the current and previous financial year, the Company's policy that no trading in derivatives for speculative purposes shall be undertaken.

The following sections provide details regarding the Company's exposure to the abovementioned financial risks and the objectives, policies and processes for the management of these risks.

There has been no change to the Company's exposure to these financial risks or the manner in which it manages and measures the risks.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting financial obligations due to shortage of funds. The Company's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities. The Company has no significant liquidity risk as it maintains a level of cash and bank balances that is sufficient for working capital purpose.

The table below summarises the maturity profile of the Company's financial assets and liabilities at the reporting date based on contractual undiscounted repayment obligations.

			Cash flows	
	Carrying amount	Contractual cash flow	Less than 1 year	Within 2 to 5 years

Credit risk

Credit risk refers to the risk that the counterparty will default on its contractual obligations resulting in a loss to the Company. The Company's exposure to credit risk arises primarily from trade and other receivables. For other financial assets (including cash at bank), the Company minimises credit risk by dealing exclusively with high credit rating counterparties.

The Company has adopted a policy of only dealing with creditworthy counterparties. The Company performs ongoing credit evaluation of its counterparties' financial condition and generally do not require a collateral. The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period.

The Company has determined the default event on a financial asset to be when internal and/or external information indicates that the financial asset is unlikely to be received, which could include default of contractual payments due for more than 365 days past the credit due dates, or there is significant difficulty of the counterparty, or no further transactions with the Company.

Cash at banks are placed with credit worthy financial institutions.

Trade and other receivables

There are no other financial assets other than trade receivables that has probable credit loss due to past due balances. The Company has determined the ECL by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, default in payments, trend of transactions in the past year and also information of the parties in the industry.

23 Financial instruments, financial and capital risk management (Cont'd)

(c) Financial risk management (Cont'd)

Credit risk (Cont'd)

Trade and other receivables (Cont'd)

The Company accordingly measured the impairment loss allowance using the lifetime ECL. The management has estimated an allowance for credit loss of S\$95,153 based on the balances that are outstanding for more than 365 days. The management has not made any further allowance for credit risk as of April 1, 2019 other than the allowance already provided of S\$28,451 in past year, as it considers the amount not significant.

As at statement of financial position date, the Company has a significant exposure of credit risk in relation to certain external debtors. The Company's trade receivables of outside parties include a customer's balance that comprise 38% (2019: a customer's balance that comprise 52%) of the total outside parties' trade receivables and contract assets. Except for the receivables from these customers, the other customers' balances are spread across various parties. The management does not foresee any risk of default by these parties as they are creditworthy customers. Further details of credit risks on trade receivables are disclosed in **Note 6** to the financial statements.

Interest rate risk

The Company has no significant exposure to market risk for changes in interest rates because it has no interest bearing borrowings from any external sources as of end of the financial year. In 2019, it had a loan from its subsidiary that bore a fixed rate of interest.

The Company has interest bearing fixed deposits. However with the current interest rate level, any variation in the interest rates will not have a material impact on the net income of the Company.

Foreign currency risk

The Company is exposed to foreign exchange risk arising from its consultancy services rendered or purchases that are mainly invoiced in Hong Kong Dollar and United States Dollar. The management monitors closely these foreign currency debtors and creditors and recovers or pays the amount at the earliest to minimise the foreign exchange risk.

As at financial year end, the carrying value of the monetary assets and liabilities denominated in currencies other than in Singapore Dollar are disclosed in the respective notes to the financial statements.

Foreign currency sensitivity analysis

Any increase or decrease in the following foreign currencies will have an impact on the financial statements:

23 Financial instruments, financial and capital risk management (Cont'd)

(c) Financial risk management (Cont'd)

Foreign currency sensitivity analysis (Cont'd)

	<u>2020</u>	<u>2019</u>
Increase in the rate of the foreign currencies by 10% against Singapore Dollar will increase/(decrease) profit before tax by the following amount:	S\$	S\$
Chinese Renminbi	39,000	30,000
Hong Kong Dollar	155,000	131,000
United States Dollar	(75,000)	22,000

A corresponding decrease in the rate of foreign currencies against Singapore Dollar will have a vice versa effect on the profit before tax of the Company by the same amount.

The effect of fluctuation in the other foreign currencies will have no or very minimal impact on the financial results of the Company.

Price risk

The Company has no significant exposure to price risk.

(d) Capital risk management

The management considers the capital of the Company to mainly consist of share holders' equity.

The management manages the capital to ensure the Company will be able to continue as a going concern while maximising the return to shareholders through optimisation of the capital.

As part of the management's review of the capital structure, the management considers the cost of capital and the risks associated with each class of capital. The management will balance its overall capital structure through the payment of dividends, new issue of shares, obtaining new loans or repayment of loans.

The management's overall strategy remains unchanged from 2019.

24 New accounting standards and FRS interpretations

At the date of authorisation of these financial statements, the following FRS and INT FRS that are relevant to the Company were issued and not effective:

		Effective from annual periods beginning on or after
Amendments to Reference	es to the Conceptual Framework in FRS Standards	
FRS 1/FRS 8	(Amendments) : Definition of Material	January 1, 2020
FRS 103	(Amendments) : Definition of a Business	January 1, 2020
FRS 109/FRS 39/FRS 107	(Amendments) : Interest Rate Benchmark Reform	January 1, 2020

24 New accounting standards and FRS interpretations (Cont'd)

The management anticipates that the adoption of the above FRS and INT FRS does not result in any significant changes to the Company's accounting policies or have any significant impact on the financial statements of the Company.

25 Authorisation of financial statements

These financial statements were authorised for issue in accordance with a resolution of the directors on ______.
