Data Governance & Metadata: Coforge team Standardization & Active Management

1

Customer

1. A Top 20 U.S. Bank

2

Business Situation

1. **The existing Governance** necessitated the publication of new Metadata Naming standards
2. Lack of well defined process & procedures to execute the Metadata standardization.

3

Solutioning

1. Defined new standards of naming business terms and capturing Metadata.
2. The Standards in-line with ISO/IEC 11179-4 have been published along with an operating model & procedures to capture and maintain metadata actively.

4

Execution

1. Standardized 2300 data elements while also rationalizing them against the existing un-published business terms.

ISO International Organization for Standardization

5

Value Delivered

1. Building Trust in Data - Stakeholders now understand each business term in context of creation and usage
2. Defining Data as a meaning - Landscape is now simple to leverage.

Team continue to demonstrate gains in knowledge and insight. They apply it daily and do this with the most wonderful demeanor. I don't need to tell you they are a delight to work with. - **Sr.Manager, Data Governance**
